

## Manuscript Review Form

Thank you for accepting our invitation to review a manuscript. You are expected to notify the Editorial Board if you are unable to complete the review within 14 days of the review invitation via email at JCEMS@JCEMS.org. Please do not share the article and/or your review with anyone other than *JCEMS* Editorial Board members. The use of Artificial Intelligence (AI) to conduct your review is prohibited by our Editorial Policies. Any perceived interest that may interfere with review of this manuscript must be reported to the Editorial Office. For more information about the review process and JCEMS, see our guide for reviewers.

Reviewer's Name: \_\_\_\_\_

Date: \_\_\_\_\_

Manuscript Title: \_\_\_\_\_

Manuscript Classification: \_\_\_\_\_

Please attach a completed version of this form to your review of the manuscript. In your review, please consider the quality, accuracy, scope, methodological rigor, depth of research, originality/novelty, and style/organization. For original research articles, focus particular attention on the methodological rigor and validity of the results. In addition, consider whether the content has practical implications for collegiate EMS providers, leaders, advisors, and affiliated personnel. Please support your judgment of the manuscript with specific facts and by pointing to specific sections/wording from the article.

Unless you recommend that the manuscript be accepted without revision, please provide specific recommendations for the author to improve the quality of the work. All recommended revisions from minor (organizational structure, style, minor requests for additional research/background, etc.) to major (major requests for additional research/background) are greatly appreciated.

---

1. **Summary of the manuscript.** Please provide a brief (1-3 sentences) description of the manuscript and its contribution to the field of collegiate EMS.

2. **Strengths & Weaknesses.** Please provide any feedback related to each section listed below. Identify the corresponding line number for any areas of improvement that you believe will strengthen the manuscript for publication.

**Abstract:**

**Introduction:**

**Methods:**

**Results:**

**Discussion:**

**3. Evaluation.** For each of the following, please select your response based on your agreement with the statement. If you selected "Disagree" or "Strongly Disagree", please describe in the "Comments" section below.

The manuscript provides a unique, quality contribution to collegiate EMS literature.

Strongly Agree    Agree    Somewhat Disagree    Disagree    Strongly Disagree

The author(s) provide a sufficient literature review/background information to understand the objective(s) of the manuscript.

Strongly Agree    Agree    Somewhat Disagree    Disagree    Strongly Disagree

The manuscript describes the methods in detail to allow for replication of the study.

Strongly Agree    Agree    Somewhat Disagree    Disagree    Strongly Disagree

The author(s) selected an appropriate means of statistical analysis for their data.

Strongly Agree    Agree    Somewhat Disagree    Disagree    Strongly Disagree

The manuscript follows a cohesive, organized flow.

Strongly Agree    Agree    Somewhat Disagree    Disagree    Strongly Disagree

The tables, figures, and/or images accompanied with the manuscript support the manuscript and improve understanding.

Strongly Agree    Agree    Somewhat Disagree    Disagree    Strongly Disagree

**Comments:**

**Recommendation:** Please indicate your overall recommendation for the editorial decision.

Reject.

Accept with *major* revisions.

Accept with *minor* revisions.

Accept *without* revisions.

Are you willing to review a revised version of the manuscript?

Yes

No

---

Please email the completed Manuscript Review Form and your attached review to the Editors at [JCEMS@JCEMS.org](mailto:JCEMS@JCEMS.org). The Editor-in-Chief will deliver the final editorial decision.
